WORK HISTORY

Salesforce Administrator Trainee

June 2026 – Present

Trailguild, India

- Built a "Soft Drink Distribution Management System" using Salesforce's declarative tools and Agentforce to automate distributor onboarding, order management, inventory tracking, approvals, and sales workflows.
- Designed custom objects, fields, page layouts, record types, and validation rules to support business requirements.
- Configured users, roles, profiles, permission sets, sharing rules, and Organization-Wide Defaults (OWD) to implement secure access control.
- Automated business processes using Record-Triggered and Scheduled Flows, reducing manual effort.
- Built reports and dashboards to monitor sales, inventory and distributor performance.
- Managed data import, export, and cleansing using Data Import Wizard and Data Loader.

Civil Engineer

August 2013 -- October 2014

Government Of Madhya Pradesh, Public Works Department, Bhopal, India

- Supervised on-site civil engineering execution for a government police housing construction project.
- Coordinated with contractors to ensure adherence to quality standards and project timelines.
- Collaborated with various stakeholders to facilitate smooth project operations.

PROJECTS

Soft Drink Distribution Management System (This project has been selected by SALESFORCE for “Agentforce In Action” Challenge 2026)

100% Declarative Salesforce Implementation with Agentforce AI Agent

- Built a fully declarative Salesforce solution for a soft drink distribution business covering distributor on boarding, order management, inventory tracking, approvals, and sales workflows.
- Designed custom objects, fields, page layouts, record types, validation rules, and Record-Triggered/Scheduled Flows to automate core business processes.
- Implemented an Agentforce AI service agent that recommends products to customers based on record data such as sugar content and ratings.
- Live Demo: [LinkedIn Project Demo](#)
